MEMORANDUM

To: Members of Shoreline Technical Advisory Committee (STAC), Shoreline Policy Advisory Committee (SPAC), Planning Commission, Board of County Commissioners and Interested Public

From: Michelle McConnell, Associate Planner, DCD

Date: November 30, 2008

Subject: Release of *Final Shoreline Inventory & Characterization Report* revised document

After months of work with consultant team ESA Adolfson, led by Margaret Clancy, we are pleased to release the *Final Shoreline Inventory & Characterization – Revised November 2008* document. The document reflects 1) committee feedback, 2) additional freshwater reaches included under SMP jurisdiction as reported in the May 2007 final STAC Draft, and 3) further revision and refinement from the June 2008 revised final document. Specific minor text changes were made that also affected formatting aspects such as page numbers and section headings throughout Chapters 1, 4 and 5. The intent of the changes was to better clarify lakes under SMP jurisdiction. Content changes are evident as follows:

- Chapter 1 – Pages 1-1, 1-8, 1-14 and 1-15 (Table 1-2);
- Chapter 4 – Pages 4-31, 4-77, and 4-91 through 4-92; and
- Chapter 5 – Pages 5-5, 5-11 through 5-21.

This *Final Shoreline Inventory & Characterization Report* (FSICR) is a required component of the SMP Comprehensive Update and serves as a technical supplement to the *Preliminary Draft SMP* staff proposal for amending the Comprehensive Plan and Unified Development Code. All jurisdictions in the state must update their SMPs by 2014, Jefferson County's legislatively mandated due date is December 2011.

This document is available for viewing and download on the project website, online at <http://www.co.jefferson.wa.us/commdevelopment/ShorelineInventory.htm>. In addition, hard copies are available for public review at our DCD Front Desk, at the Jefferson County Library and at the Forks Library. The document can also be purchased here at DCD as a hard copy (\$0.15 per page) or as a compact disc (\$1.10).
